

PHILIPS

Essential SmartBright

LED Downlight

Experience
hassle-free installation
With reliable and compact design that is cost efficient

Features and benefits

1 Easy installation and replacement

- Good range of wattages and color temperatures enhances flexibility and choice.
- Three standard cut-out sizes (5", 6", 7") ensure easy retrofit.

2 Compact design for greater functionality and versatility

- Slim design with integrated driver. (exclusive to Philips)
- Flat design fits tight spaces, enabling easy installation into low suspension ceilings or false ceilings.
- Compact, all-in-one design makes installation a breeze.
- Installation clip spring can be used with ceilings of various thickness and materials.

3 Leading brand with safety and quality assurance

- Meets international standards and certifications.
- Reliability and quality that offers peace of mind.
- LED technology ensures long lifespan with minimal maintenance, bringing you value for money, and cost savings in electricity bills in the long-run.

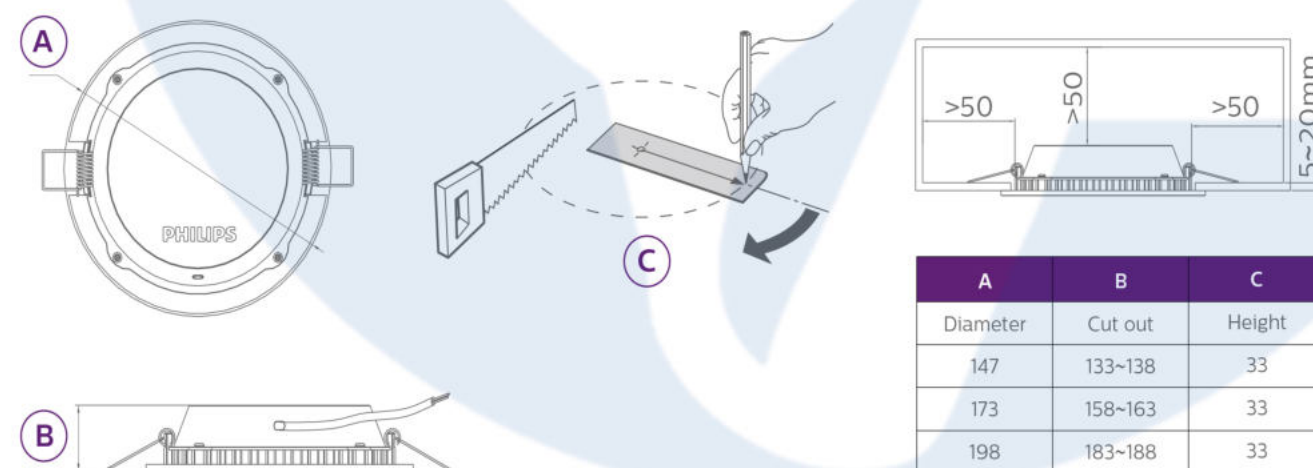

High performance downlight that meets your needs

With so many LED downlights available in the market, how do you choose the best option for your project or home? The Philips Essential SmartBright LED Downlight simplifies that decision. Boasting good quality and reliable performance, coupled with an affordable price tag, it offers you the best value in the market.

The slim and compact design makes the Essential SmartBright LED Downlight highly versatile. It can be installed easily even when space is a constraint, such as in low suspension or false ceilings. It comes with an integrated driver, so installation is effortless and time-saving.

Philips Essential SmartBright LED Downlight promises long-lasting LED performance, functionality and cost-savings. Designed with your needs in mind, it is your ideal choice for commercial and retail spaces, public areas corridors, offices and homes.

Dimensional drawing

All dimensions in mm

Product data

Housing	Aluminium die cast
Housing paint	White, RAL9003
Diffusor	PMMA
Cut-out	133~138mm, 158~163mm, 183~188mm
Height	33mm
Voltage/frequency	220-240V, 50/60Hz
Power factor	0.75~0.8
Wattage	11/15/20w
Connecting method	Flying wire with easy terminal offered
Color temperature	3000/4000/6500K
Lumen output	900/1200lm
Color rendering index	70+
Ta	25°C
Operation temperature	-20~40°C
Lifetime	15,000 Hrs (L70 B50)
Package	6 units in one carton
